Synopsis book

The captivating story of Frédéric Chopin and the fate of both his Malorquin piano and musical Romanticism from the early nineteenth to the mid-twentieth century. In November 1838, Frédéric Chopin, George Sand, and her two children sailed to Majorca to escape the Parisian winter. They settled in an abandoned monastery at Valldemossa in the mountains above Palma where Chopin finished what would eventually be recognized as one of the great and revolutionary works of musical Romanticism: his twenty-four Preludes. There was scarcely a decent piano on the island (these were still early days in the evolution of the modern instrument), so Chopin worked on a small pianino made by a local craftsman, Juan Bauza, which remained in their monastic cell for seventy years after he and Sand had left. Chopin's Piano traces the history of Chopin's twenty-four Preludes through the instruments on which they were played, the pianists who interpreted them, and the traditions they came to represent. Yet it
